Justice-Oriented Strategies for
Social Adaptive Risk Management

About

JUSTSAFE is a Horizon Europe project advancing fair and inclusive climate resilience across Europe. By centring vulnerable and marginalised groups, it supports local authorities – through co-creation, citizen engagement, and innovative tools – to design just, accessible responses to climate risks, contributing to the EU Mission on Adaptation.

Project partners:

This project has received funding from the Horizon Europe research and innovation programme under the GA No. 101215174.

25 Consortium partners

12 European Countries

48 Project Months

+7 Millions Budget

6 Tangible Solutions

Cities / Regions

Vision

Climate risks are experienced unevenly across Europe, often reinforcing existing social inequalities. JUSTSAFE responds to this challenge by rethinking how climate adaptation is designed and delivered, ensuring that justice, accessibility, and local realities guide decision-making. By connecting communities, local authorities, and knowledge from various cities and regions, the project helps translate inclusive climate ambition into meaningful, long-term action on the ground.

Mission

- Encourage co-creation, activism, and political engagement in climate action.
- Promote inclusive climate and digital strategies for vulnerable groups.
- Empower vulnerable groups to co-design climate solutions.
- Build local capacity through training and digital tools.
- Strengthen local authorities through knowledge and community engagement.
- Focus on people and nature-based solutions, not just hazards.
- Develop targeted communication tools for climate adaptation.

● Demonstrator ● Replicator ● Demonstrator & Replicator

6 Demonstrator cities/regions across Europe will test JustSafe solutions in real-life settings, ensuring inclusive, just, and locally grounded climate adaptation.

5 Replicator cities/regions across Europe will adapt and transfer solutions, building on lessons from the demonstrator cities to support wider uptake and scalability.

Egaleo (Greece) ↔ **Constanta (Romania)**

Inclusive Urban Climate Resilience Through CAH (climate anxiety hub) and CSDT (Climate Social Digital Twin)

Hamburg (Germany) ↔ **Hatay (Turkey)**

Building Heat Stress Resilience during pregnancy via COMICS - 'CONveying Medical Information through Comics'

Ampostà (Catalonia) ↔ **Egaleo (Greece)**

Enhancing Urban Nature-Based Solutions through Participatory Approaches and Citizen Science

Žilina & Chios (Slovakia, Greece) ↔ **Osmaniye (Turkey)**

Demonstrate local authorities' capacity for equitable adaptation by increasing resilience, reducing vulnerabilities, and addressing flood and heatwave risks at the local & regional scale through fair, just and inclusive climate actions.

Hatay (Turkey) ↔ **Smiltene (Latvia)**

Community-based greening activity in disaster impacted region and temporary settlement to strengthen the capacity of local authorities in climate adaptation.

Impact

JUSTSAFE contributes to more equitable and inclusive climate adaptation across Europe by reducing social vulnerabilities and strengthening local capacity to respond to climate risks. Through real-life demonstrations and cross-regional learning, the project supports more informed decision-making, improves access to climate adaptation tools and enables solutions that can be transferred beyond pilot areas. Its impact extends beyond individual cities, informing policy and practice at the European level and supporting long-term, just climate resilience.
